<b>Demand Response Summary:</b>	The Pro1 implementation of OpenADR 2.0b allows enrolled customers to participate in load shedding events. Events can target specific devices via a variety of parameters including enrollment status and zip code. Upon receiving an event signal, the connected thermostat provides customers options on how it should respond. Options include accepting/denying the load shedding event. Work is in progress to fully comply with capabilities listed in CEC Title 24, Part 6.
