## Espen - EVC/A48S/JXX/EG/5D : EVC/A48S/JXX/EG/5D

| o :c ::   |                                    |
|---|------------------------------------|
| Specifications  |                                    |
| Brand Name:   | Espen                              |
| Model Name:   | EVC/A48S/JXX/EG/5D                 |
| Model Number:   | EVC/A48S/JXX/EG/5D                 |
| ENERGY STAR Unique ID:                                | 2514648                            |
| ENERGY STAR Partner:                                  | Espen Technology Inc.              |
| Product Type:   | Level 2                            |
| Input Voltage (V):                                    | 240.0                              |
| Max Nameplate Output Current (A):                     | 48                                 |
| Maximum Output Power (kW):                            | 11.52                              |
| Number of Outputs:                                    | 1                                  |
| Maximum Output Cord Length (ft.):                     | 18                                 |
| Output Cord Gauge (AWG):                              | 7                                  |
| Automatic Brightness Control (ABC) Capable?:          | No                                 |
| <b>Network Connection Types Available:</b>            | Wi-Fi or Gigabit Ethernet,Cellular |
| Screen Area, if EVSE has high res display (in2):      | 7.93                               |
| 15 A Operation Mode Test: Total Loss (watts):         | 10.5                               |
| 30 A Operation Mode Test: Total Loss (watts):         | 33.7                               |
| 4 A Operation Mode Test: Total Loss (watts):          | 4.0                                |
| Full Current Operation Mode Test: Total Loss (watts): | 78.9                               |
| Idle Mode Input Power (watts):                        | 5.23                               |
| Idle Mode Power Factor:                               | 0.33                               |
| Idle Mode Total Allowance (watts):                    | 23.63                              |
| No Vehicle Mode Input Power (watts):                  | 3.78                               |
| No Vehicle Mode Power Factor:                         | 0.28                               |
| No Vehicle Mode Total Allowance (watts):              | 4.43                               |
| Partial On Mode Input Power (watts):                  | 3.84                               |
| Partial On Mode Power Factor:                         | 0.29                               |
| Partial On Mode Total Allowance (watts):              | 4.43                               |
| Date Certified:                                       | 2022-04-19                         |
| Date Available on Market:                             | 2022-04-19                         |
| Markets:  | United States, Canada              |
| <b>ENERGY STAR Certified:</b>                         | Yes                                |
