

ENERGY STAR CERTIFIED

# Electric Vehicle Chargers (AC-Output)

## Blink Network, LLC - Series 8 : 880

### Specifications

|                                                              |                                                                   |
|--------------------------------------------------------------|-------------------------------------------------------------------|
| <b>Brand Name:</b>                                           | Blink Network, LLC                                                |
| <b>Model Name:</b>                                           | Series 8                                                          |
| <b>Model Number:</b>                                         | 880                                                               |
| <b>ENERGY STAR Unique ID:</b>                                | 2732485                                                           |
| <b>ENERGY STAR Partner:</b>                                  | Blink Network LLC                                                 |
| <b>Product Type:</b>                                         | Level 2                                                           |
| <b>Input Voltage (V):</b>                                    | 240.0                                                             |
| <b>Max Nameplate Output Current (A):</b>                     | 80                                                                |
| <b>Maximum Output Power (kW):</b>                            | 19.2                                                              |
| <b>Number of Outputs:</b>                                    | 2                                                                 |
| <b>Maximum Output Cord Length (ft.):</b>                     | 23                                                                |
| <b>Output Cord Gauge (AWG):</b>                              | 6                                                                 |
| <b>Automatic Brightness Control (ABC) Capable?:</b>          | No                                                                |
| <b>Network Connection Types Available:</b>                   | Wi-Fi or Gigabit Ethernet,Other LAN (Local Area Network),Cellular |
| <b>Full Current Operation Mode Test: Total Loss (watts):</b> | 74.0                                                              |
| <b>Idle Mode Input Power (watts):</b>                        | 9.01                                                              |
| <b>Idle Mode Power Factor:</b>                               | 0.0                                                               |
| <b>Idle Mode Total Allowance (watts):</b>                    | 44.5                                                              |
| <b>No Vehicle Mode Input Power (watts):</b>                  | 6.75                                                              |
| <b>No Vehicle Mode Power Factor:</b>                         | 0.0                                                               |
| <b>No Vehicle Mode Total Allowance (watts):</b>              | 13.5                                                              |
| <b>Partial On Mode Input Power (watts):</b>                  | 7.75                                                              |
| <b>Partial On Mode Power Factor:</b>                         | 0.0                                                               |
| <b>Partial On Mode Total Allowance (watts):</b>              | 13.5                                                              |
